## RUIFIER

## Let's find the ring that fits!

A STEP-BY-STEP RUIFIER GUIDE

Use this guide along with an existing ring of similar band width and style to the one you would like to purchase, to determine the correct fit.

Step 1 - Print this page and ensure the printer scale setting is set to 'none' or 'actual size'. If the below line is exactly $50 \mathrm{~mm}(5 \mathrm{~cm})$ then you're ready to move to step 2.

50 mm

Step 2 - Place your ring on the outlines below and when the circle meets your ring, you've found the perfect fit!

Step 3 - Note your number and proceed shopping! If your ring falls between two sizes, we do suggest to go for the larger size.
